DETAILED ACTION

1. Claims 1-20 are pending.

Election/Restriction

2. Applicant's election with traverse of Group I, Claims 1-7 and 12-20 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the groups of inventions of Groups I and II are not complex, the Examiner will duplicate efforts searching both Groups I and II separately, the starting material is novel, there is no burden to search both inventions, etc. The examiner disagrees with applicants. Restriction requirement is not based on the complexity of the invention, but the nature of the invention. In instant case, the restriction was based on the intermediate-final product relationship as set forth on the restriction requirement (Paper No. 4). The intermediate product is deemed to be useful as starting material to make diazonium ion for Scheimann reaction and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Applicants are silent in refuting the points made in restricting the inventions (i.e. the intermediate –final product relationship). Applicant's lengthy argument in regard to the search strategy is acknowledged, but it is not persuasive. In addition to the intermediate-final product relationship, the coexamination of additional group would require search of subclasses unnecessary for the examination of the elected claims. The search for the invention of Group II would include search of subclass 564/86 and

Art Unit: 1624

564/87. Therefore, coexamination of the additional invention would require a serious additional burden of search.

The requirement is still deemed proper and is therefore made FINAL.

Claims 8-11 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention, the requirement having been traversed in Paper No. 5.

Allowable Subject Matter

3. Claims 18 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 17 and 19, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).
